PROJECTS

Unity Indie Game
Created the foundation for a roguelike 2D indie game. Programmed the basics for the gameplay as well as the sprites and animations for the character. Some of the features include a movement controller, collision handling, and gun mechanics.

Drawing Application
Programmed a versatile art application as a fun exercise. The program allows the user to draw and erase on a canvas. It also contains other features, such as a fill bucket for efficient coloring, variable brush sizes, and an undo mechanism.

JOB EXPERIENCE

Computer Connection, 6607 N May Ave. – *Sales*
March 2023 – Present
I was responsible for building computers and assisting customers with choosing parts or repairing their current PCs.
